Growing Paper uses only the highest quality tested and approved seeds we can source, and frequently conduct germination test at independent laboratories as well as at our own growing rooms. However, seeds are living products and thus we cannot guarantee growth success. Like with any seed or plant, the paper needs to be cared for and properly treated during germination and growth. Plant in the correct season and keep moist.

Please remember our products are made by hand. Our products are of a very high quality but not machine perfect. Our paper is very unique which make alignment tricky. Keep this in mind when doing artwork and placing your order.

Ink Coverage

- Our standard costs are based on full-colour printing with up to 30% ink coverage. Any increase in the ink coverage will increase the price significantly.
- Ink coverage measures the percentage of a page covered by ink during printing.

Make sure your PDF Artwork is set to the actual size ordered | 300ppi/dpi

The red line shows where the product will be trimmed.

Required

OUR PAPER HAS A ROUGH TEXTURE WITH SEEDS:

- Text or design might be printed over seeds.

BORDERS & DOUBLE-SIDED PRINTING:

- Restrict borders to only **one of the sides**.
- Restrict design to the edge/full design only to **one of the sides**.
- Artwork that allows for slight shifting is preferred because of paper texture.
- Text 5mm from the edges.

FILE FORMAT (VERY IMPORTANT)

- **CONVERT TEXT TO CURVES/OUTLINES.**
- When using Canva, please tick the **FLATTEN PDF** when downloading the print file.
- **WHY? To avoid font substitution issues when printing.**

For your Information

- Our paper is really cool, so we believe less is more...
- Solid background colours can be problematic, potentially leading to printing lines and a compromised finish.
- Additionally, excessive ink coverage can result in higher waste rates due to prints being rejected for quality issues.
- Our printers and printing methods are not suitable for printing solid background colours.
- A WHITE/CLEAR BACKGROUND IS PREFERRED.

Recommended

Inform the receiver that this paper is plantable by adding our planting icons or planting instructions to your design.

Please ask us and we will gladly supply the planting instructions or icons.

Bleed Explained:

The red line is where the card will be trimmed.

This is the 3mm bleed.

Bleed refers to the extra 3mm of image or background colour that extends beyond the trim area of your printing piece.

This will ensure the print extends to the edge of the item after trimming.
